

HP Halo Collaboration Studio Executive Edition

Base Price Components and Services

Real-time clarity. Dependable simplicity. Worldwide consistency.

A fully managed end-to-end video exchange solution from Hewlett-Packard, Halo brings team members and clients from across the globe into an environment that looks, sounds and feels as if they are just across the table. The Executive Edition of the HP Halo Collaboration Studio is HP's ultimate collaboration solution, enabling companies with geographically dispersed teams to accelerate decision-making, maximize productivity and enhance personal connections. Halo breaks down the barriers to global communication, providing secure, broadcast-quality collaboration and data sharing in real-time. Anytime.

Halo

Executive Edition

The Halo difference—it's in the network

The Halo Executive Edition provides users with an unparalleled immersive experience through HP's private Halo Video Exchange Network (HVEN), a network designed specifically for optimal video performance. Through the HVEN, meeting participants can depend on a consistent "no-perceived-delay" experience, whether they're connecting across town or halfway around the globe. Additionally, Halo is an end-to-end managed solution. There's no need to upgrade existing network infrastructure or hire specially trained IT personnel to manage Halo studios. HP takes care of everything and provides 24x7 concierge service.

The Executive Edition—Standard Features

- **Halo Multipoint capabilities:** Collaborate with up to 16 different participants located across the country or around the world. Halo Multipoint features 3-axis control operation that automatically adjusts to provide superior eye contact and geometric consistency.
- **Dedicated collaboration channel:** Share presentations, video or Computer-Aided Design (CAD) images from your laptop computer. View hard copy documents or handheld objects via a high-definition document camera. The dedicated collaboration channel includes a high-definition collaboration screen and proprietary software.
- **Proprietary Graphical User Interface (GUI):** Connect one studio location to another with a few mouse clicks. Halo studios feature a user-friendly HP proprietary graphical user interface and software widely considered to be the best in the industry.
- **Studios designed for optimal collaboration:** Immerse yourself in the "same room" experience only Halo can deliver. Halo takes telepresence into a new dimension with a combination of state-of-the-art studio design and precision components. This includes specially designed sound absorbing wall coverings, fully duplexed sound, a graphic eye lighting control system, and an executive rounded table with Aeron-branded chairs.
- **High-definition document camera:** The high-definition document camera included with the Halo Executive Edition studio is capable of displaying 1280x960 or 720HD, with a max zoom of 64x.
- **Construction consulting:** Utilize the expertise of a Halo construction specialist. Your consultant will provide advice and recommendations during the construction of the studio, evaluating customer preferences during every phase of the build.
- **Integrated equipment room:** The Halo equipment rack can be integrated into the front wall of a studio, with easy access through a door next to the plasma monitors. This reduces studio site preparation costs by eliminating the need for a separate equipment room, while providing ease of access to the studio equipment.
- **HP on-site installation:** HP's team works with you to ensure a remarkable collaborative experience, from pre-construction site survey to final delivery of a ready-to-use Halo studio.
- **24x7 installation:** Minimize disruptions to normal business activities by scheduling your studio installation for non-working hours, including weekends.

Interoperability with standards based video conferencing

Through our recently announced partnership with Tandberg, HP will be offering interoperability between Halo collaboration studios and existing standards based video conferencing equipment. Contact your local Halo sales representative for more details.

Standard components checklist—Executive:
